## Content and Professional Community Policies

---

Thank you for using SpaceApp Community, where the world's space professionals and fans come together to stay informed, learn new skills, and build productive relationships. The content that you contribute to SpaceApp should be professionally relevant and meant to contribute to the SpaceApp community in a constructive manner.

SpaceApp Community is a vast network of communities that are created, run, and populated by you. Through these communities, you can post, comment, vote, discuss, learn, debate, support, and connect with people who share your interests.

While not every community may be for you (and you may find some unrelatable or even offensive), no community should be used as a weapon. Communities should create a sense of belonging for their members, not try to diminish it for others. Likewise, everyone on SpaceApp should have an expectation of privacy and safety, so please respect the privacy and safety of others.

Every community on SpaceApp.org is defined by its users. Some of these users help manage the community as moderators. The culture of each community is shaped explicitly, by the community rules enforced by moderators, and implicitly, by the upvotes, downvotes, and discussions of its community members. Please abide by the rules of communities in which you participate and do not interfere with those in which you are not a member.

Below the rules governing each community are the platform-wide rules that apply to everyone on SpaceApp.org. These rules are enforced by us, the admins.
